

REMARKS/ARGUMENTS

The specification has been amended to clarify the equations found in paragraph 2. Although these equations were presented on different lines in the specification as filed, they are shown in the same line in the published specification.

The amendment to the heading in column 3 of the published application, between paragraphs 10 and 11, was made to render this heading consistent with the description that follows, which description clearly relates to aspects of the invention, rather than purporting to be a description of the invention itself.

The amendment to claim 10 has been made to correct an inadvertent clerical error.

It is respectfully submitted that no new matter is added by these amendments.

Entry of the amendments is respectfully requested.

If any questions arise, it is requested that the undersigned be contacted at the number provided below.

Respectfully submitted,

BERESKIN & PARR
